

# Floral Spray Foam Instruction

Floral Spray Foam fills any container shape with floral foam to create an arrangement. It is convenient and doesn't create a gritty mess. There is no waste because you only spray what you need.

### Before using

- This product is extremely flammable during dispensing.
- Wear protective gloves, protective eyewear and suitable work clothes during use.
- Use with adequate ventilation.
- Optimum temperature for use is between 65-85°F (18-27°C). Clean dust, grease and oil off surfaces to be foamed. Cover surrounding surfaces.
- Shake well. Screw nozzle adapter onto valve stem, being careful not to activate valve.
- Store upright in cool, dry area. Leave nozzle on can. To reuse, cut 1 in. (3cm) off nozzle tip.
- Test on experimental surface. With valve end of can down, slowly press trigger to dispense foam.
- Dries tack-free in approximately 5 minutes, cures in 12-24 hours. Do not disturb uncured foam.
- Uncured foam may be removed with acetone. Cured foam must be removed mechanically.
- Cured foam can be trimmed or sanded. Cured foam exposed to sunlight must be covered with paint or stain.

## How to Use:

1. Remove nozzle and valve attachment from packaging.
2. Remove cap. Screw applicator nozzle to canister.
3. Hold canister with nozzle facing down.
4. Lightly mist the inside of the container with water (fig.1) and fill container with one layer of foam at a time,(fig.2) no more than 1/3 full.
5. Repeat misting and allow foam to expand before adding additional layers of foam. (fig.3)
6. Let foam cure for 12-24 hours before trimming, sanding or arranging. (fig.4)

**DANGER:** Extremely flammable. Contents under pressure. Lung, skin and eye irritant. Avoid exposure. Vapor may cause flash fire.
